

WeighStar

Model #: WS120

Technology

The WeighStar inspection system is ideal for checking fill level of cans on microbrew production lines. The device incorporates a precision load-cell that weighs the can to determine fill. A simple touch screen interface allows direct entry to set over and under limits. Each can's weight is displayed as well as the total production count and eject count.

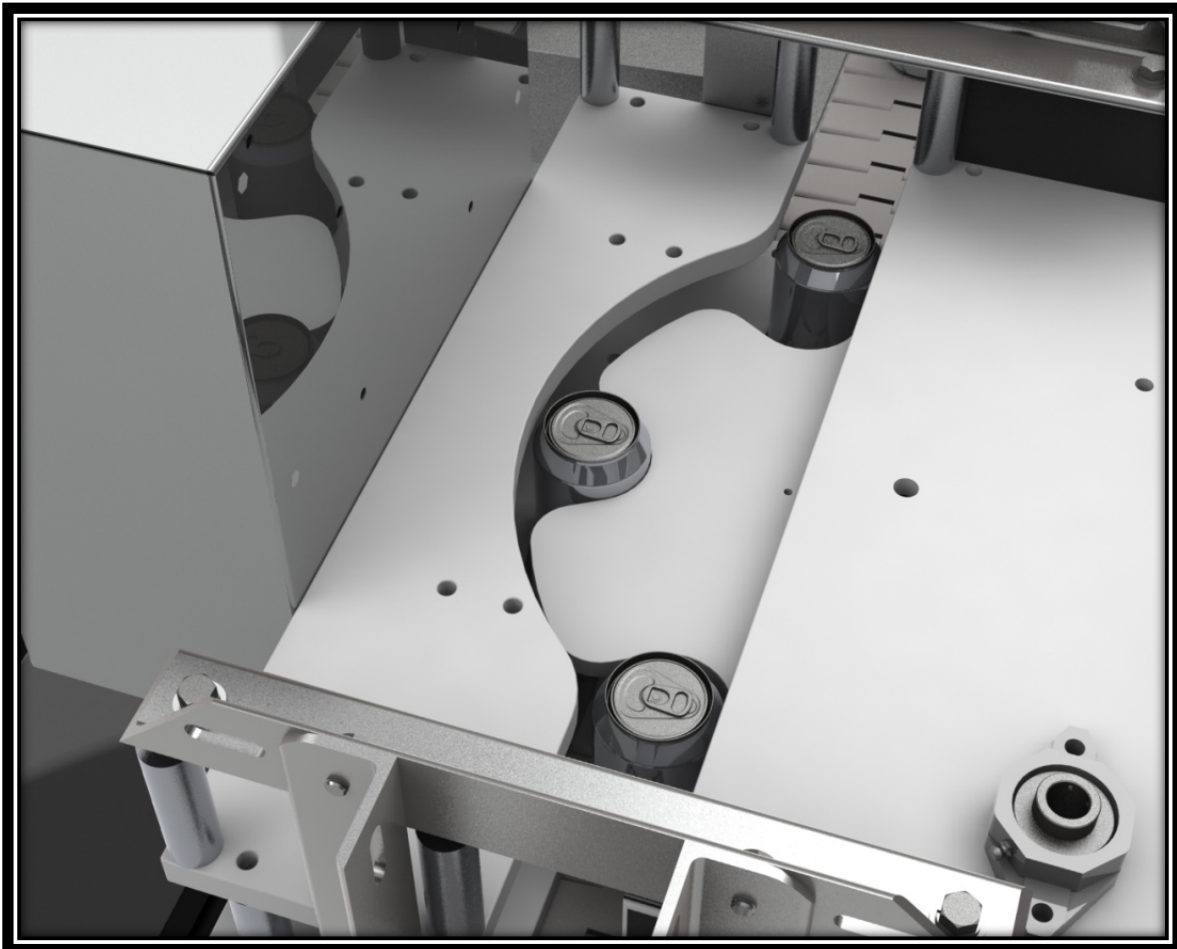

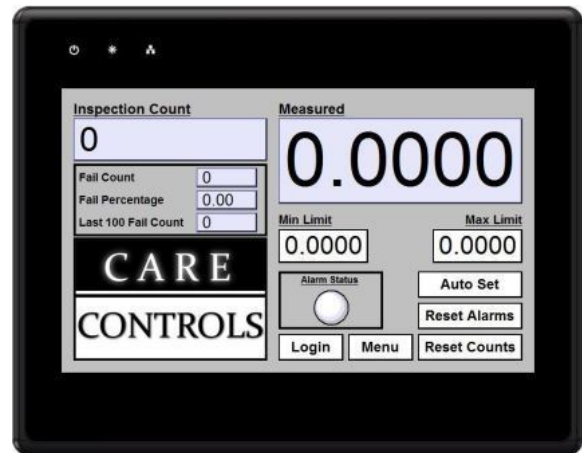

Care Controls, Inc.

Highlights

- A pneumatic ejection system removes the can from the line if over or under filled.
- Designed for simple installation on existing transporting conveyors after the filling machine.
- Inspection speeds up to 120 cans per minute.

Specifications

Production Speed	120 cans per minute for 12 and 16 oz cans
Accuracy	+/-5 grams (1 gram=1ml) to insure labeling law regulations for fill
Environment	Manufactured from engineered plastics, stainless steel and anodized aluminum. Nema 4x, IP 65 ratings
Cleaning Procedures	Hand Wash, gentle water rinse
Utilities	115/220 VAC single phase, 5 amp power Pneumatics: 40 psi, 10 scfm flow (1/4 poly air line, 80 psi air supply)

Options

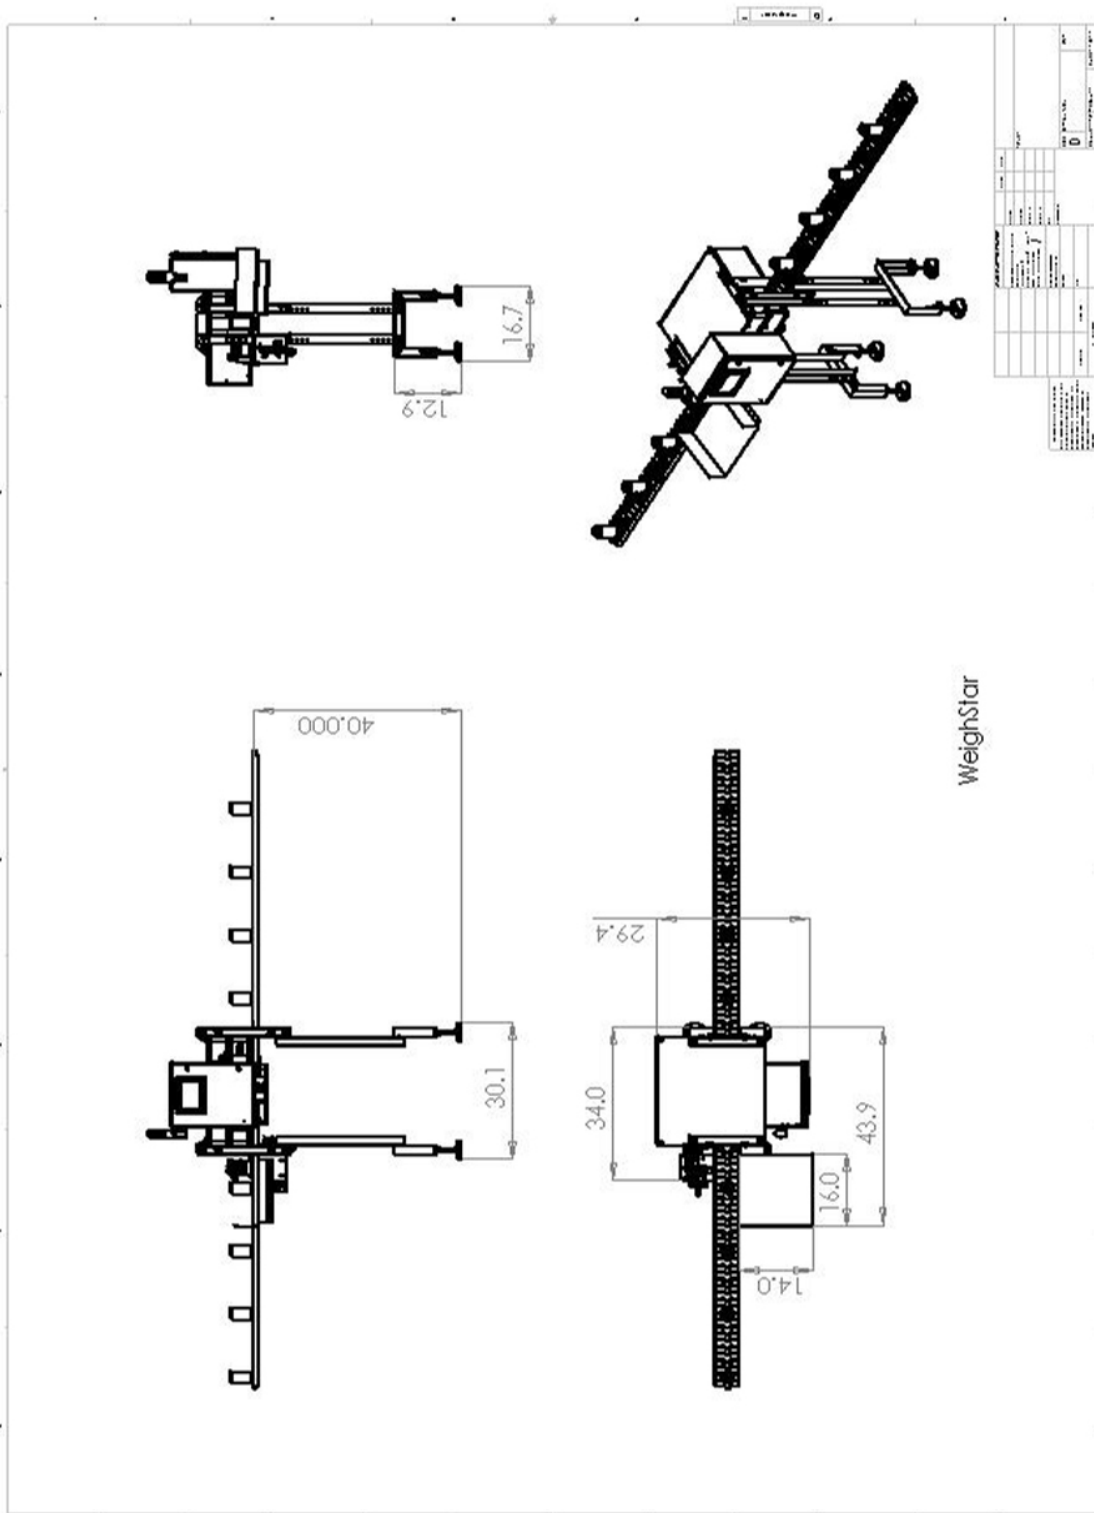

1. No lid sensor (missing cover)
2. 14x16 stainless steel ejects tray
3. Legs to the floor for additional stiffening of the existing conveyor
